Comeet's offering and special sauce

WHAT WE OFFER

Comeet offers a cloud-based collaborative recruiting platform that looks like user-friendly consumer software. We provide structured and streamlined processes to enable companies to make better hires, faster.

Comeet helps hiring teams automatically schedule interviews, prep, engage with candidates and each other, evaluate talent in real-time, and provide meaningful feedback. Because we track candidate selection and evaluation and ensure interview consistency, hiring becomes a quantitative, as well as qualitative process. More metrics and better insights means teams can identify what's working or not working, and make long-term improvements.

Comeet requires little to no training. Because it is so easy to use, we have a very high participation rate, making the platform not only collaborative in theory but also in practice. Actually, our usage metrics show that **for each recruiter there are 8 active users with non-HR titles**, including the hiring manager, interviewers and executives.

You can read more about Comeet's collaborative recruiting platform [here](#) or visit our website at: www.comeet.co.

WHAT MAKES US SPECIAL

Best would be to ask our customers why they chose us and stuck around. We've collected their feedbacks [here](#). However, to summarize, these are the main ingredients that have helped us gain the support and trust of our customers:

- A team centric hiring approach with a collaborative recruiting model.
- An enterprise grade platform with consumer product simplicity.
- An efficient platform that includes automated, standardized processes, recruiting optimization and built-in referral programs

The result: Better quality hires as well as a faster and more efficient recruiting process.
